DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Figures 1a (with either Figure 6/6a), 1b, 1c (with either Figure 6/6a), 1d and 1e (with either Figure 6/6a/6b) are each directed to a different species:

a) Figure 1a (with either Figure 6 or 6a) includes a camera 10, fiber transmitter 6 and receiver controller 11;

--where the camera 10 (Fig 4) includes a control code extractor which can be either Fig 6 or 6a.

b) Figure 1b includes a camera 12, fiber receiver 8 and receiver controller 9;

c) Figure 1c (with either Figure 6 or 6a) includes a camera 10, fiber transmitter 6, fiber receiver 8 and receiver controller 9;

--where the camera 10 (Fig 4) includes a control code extractor which can be either Fig 6 or 6a.

d) Figure 1d includes a camera 12 and receiver controller 11;

e) Figure 1e (which includes either Figure 6 or 6a for camera 10 and Fig 6b for camera 12) includes;

1) a camera 12 (Fig 6b) connected to receiver controller and selector 90;

2) includes a camera 10 (Fig 6/6a) connected to fiber transmitter 6 and receiver controller and selector 90;

3) includes a camera 12 (Fig 6b) connected to fiber receiver 8 and receiver controller and selector 90.

It is noted by the examiner that if the applicant elects Fig 1e, this species election might also again be restricted based upon the claims directed towards the species (i.e. subcombinations useable together).

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Figure 1d is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
